DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Regarding Claims 1 and 8, prior art fails to show alone or in combination that the means for determining a rate at which the source data is to be transmitted, on the basis of the detected number of devices and a type of the source data, wherein when the detected number is greater than a preset value, the rate is determined lower than when the detected number is not greater than the preset value and means for controlling an encoder to vary an amount of the generated transmission data on the basis of the determined rate of the source data.. It is noted that the closest prior art, Ekudden et al, U.S. Patent No. 6163577, Takeo, U.S. Patent No. 6385183 and Kisor U.S. Patent No. 6782429 teach an electron apparatus comprising an encoder, a wireless communication device, means for detecting the number of device connected to the wireless device, means for determining the rate at which the source data is to be transmitted. However, Ekudden et al, Takeo and Kisor fail to teach or render obvious the above limitations as claimed.

Regarding Claims 2-5, 7, 9-12 and 14, they are allowable because they are the dependent claims depending on the allowable independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
